

Material Science & Engineering with Advanced Research (MSEAR)

Special Issue on

High Temperature Permanent Magnets

Material Science & Engineering with Advanced Research (MSEAR) is a **Peer- Reviewed; Open Access** journal that publishes original research studies along with review, short communication etc., encompassing fundamental and applied research in all disciplines of **Material science**.

MSEAR gives you precise and in-depth information on all the important issues in the global field of Material Science Engineering and its related topics.

In an approach to share your work related in the field of **High temperature Permanent Magnets**, Material Science & Engineering with Advanced Research Journal welcomes papers from worldwide researchers.

With this initiative, we intend to bring-out the research advances in **High temperature Permanent Magnets**, and make them easily accessible by your participation and cooperation.

Submissions:

All kinds of papers are invited. Please refer [Author guidelines](#) before submission. Use the online link to [submit](#) your papers or e-mail it to materialsscience@verizonaonlinepublishing.com

Editor-in-chief:

Prof. Sofoklis Makridis

Department of Mechanical Engineering, UoWM, Kozani, Greece

Guest Editor:

Dr. Wei Tang

Ames Laboratories, USA
